PERSONAL PROJECTS

FaceGrips

- **Stack**: Frontend website build using React.js, custom CSS.
- **Functionality**: A website built with Face-Api.js to detect the number of human faces and their expressions in user's uploaded image. Users can also download the labeled images for future use.

CodeSheet

- **Stack**: React.js, Node.js, Express.js, MongoDB
- **Functionality**: A developer-friendly tool for saving and managing code snippets. Users can pin, create, edit, update, delete, and search snippets after logging in.
- **Libraries**: prism.js, prism.css, bcrypt.js.

AI Brain Box (FYP)

- **Stack**: React.js, Node.js, Express.js, MongoDB
- **Functionality**: A educational web tool to streamline the process of text summarizing. Grammar-mistakes correction, audio file transcription and code generation. Users can register and then use different AI tools.
- **Libraries**: streamlit, pytube, voice-recognition, gramfomer, code-lama.
